

# Respect the River

## **Beware of strong currents**

Even when there doesn't appear to be rapids, the water can move very quickly.

## **Beware of the uneven river bottom**

The depth of the bottom of the river can drop off quickly. The bottom may be rocky and contain trash such as glass or fishing hooks.

## **Always wear a life jacket**

The depth of the river can change within hours so always be aware of your surroundings.

## **Never go to the river alone**

Children should always be with an adult when they are at the river.
